

Manut-LM, a French manufacturer, designs handling solutions for lifting cardboard boxes, containers, pallets, spools, suitcases, etc.

PROVIDING SAFETY AND PRODUCTIVITY DURING HANDLING OPERATIONS IN WAREHOUSES OR LOGISTICS PLATFORMS

Repetitive handling of loads such as boxes, containers, pallets, spools, etc. can cause fatigue leading to reduced productivity and increase the risk of work related accidents and MSDs (musculoskeletal disorders).

Manut-LM's made-to-measure solutions can be adapted to the constraints of warehouses and logistics platforms. The installation of jib cranes or overhead cranes allows you to move all your loads up to 250 kg over a large area.

Investing in a Manut-LM solution allows you to:

- Eliminate human risks related to manual handling of loads
- Increase your productivity in a supply chain
- Secure your processes
- Improve the well-being of operators

Suction system

Lifting up to 250KG

Prevents MSDs

Increases productivity

DID YOU KNOW?

Manut-LM, located in Ancenis (Loire-Atlantique) is a French manufacturer that has been manufacturing made-to-measure lifting-tube handling solutions for 30 years.

BAG HANDLING

PALLETIZING
DEPALLETIZING

Bag handling is a repetitive action that can be a risk factor for musculoskeletal disorders (MSDs). Manut-LM solutions eliminate MSD risks by lifting and moving bags ergonomically and effortlessly with the help of suitable suction cups.

TRAY HANDLING

PALLETIZING

With Manut-LM solutions you can lift containers safely and effortlessly, increasing your productivity tenfold. Our gripping tools are designed specifically for the type of containers you use and enable fast and accurate handling.

CARDBOARD BOX HANDLING

PALLETIZING

Palletizing or depalletizing boxes involves repetitive actions that are an aggravating factor in MSDs. Manut-LM designs solutions to facilitate the handling of boxes thanks to a suction lifting system. The handling can be carried out with several boxes thus resulting in increased productivity.

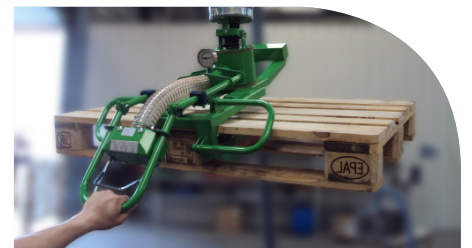

PALLET HANDLING

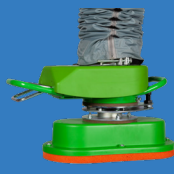

PALLETIZING

Manut-LM solutions enable pallets to be lifted safely to increase your productivity tenfold while reducing the human risk of MSDs (musculoskeletal disorders). Our gripping tools are specifically designed for a fast and precise grip by fork or suction cup according to your needs.

ERGO : trigger mechanism

EASY : trigger mechanism

MASTER : rotating handle

OUR RANGE OF PRODUCTS

Manut-LM will guide you to choose the range of control handles best suited to your load handling.
