

Manut-LM, a French manufacturer, designs handling solutions for lifting trays, buckets, bags, cheeses, large bulks of butter and meats, bottles, canned goods, etc.

HANDLING OF FOOD LOADS OR PACKAGING  
FOR THE FOOD INDUSTRY

Manut-LM products can lift all types of food loads (trays, boxes, bags, food loads, etc.) as well as their packaging, thanks to a lifting tube suction system.

Manut-LM's made-to-measure solutions are adapted to the constraints of the food industry, particularly in terms of health and safety standards regarding the materials used. Our products are made-to-measure to adapt to your specific processes, pace and loads.

Investing in a Manut-LM solution enables you to:

- Increase your productivity on a food production line
- Eliminate the risks associated with manual load handling
- Secure your processes
- Improve the well-being of operators

Suction system

Lifting up to 250KG

Prevents MSDs

Increases productivity

**DID YOU KNOW?**

Manut-LM, located in Ancenis (Loire-Atlantique) is a French manufacturer that has been manufacturing made-to-measure lifting tube handling solutions for 30 years.

## HANDLING OF FOOD LOADS

CUTTING AND PACKAGING

Manut-LM has designed solutions that allow the handling of many food loads: cheese, butter and meat in bulk. These solutions make it possible to move loads at high speed while eliminating the difficulty of the operation and guaranteeing full compliance with health and safety standards.

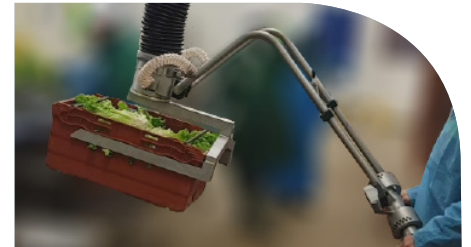

## TRAY HANDLING

PALLETIZING

With Manut-LM solutions you can lift trays safely and effortlessly, to increase your productivity tenfold. Our gripping tools are designed specifically for the type of containers you use and allow for fast and accurate handling.

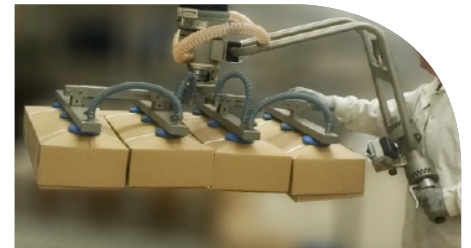

## BOX HANDLING

PALLETIZING

The placing or removal of boxes from pallets involves repetitive gestures that are an aggravating factor in MSDs. Manut-LM designs solutions to facilitate the handling of boxes thanks to a vacuum lifting system. Handling can be done with several boxes at the same time, to maximize operator productivity.

## BAG HANDLING

PALLETIZING  
DEPALLETIZING

Bag handling is a repetitive action that can be a factor in musculoskeletal disorders (MSDs). Manut-LM solutions eliminate MSD risks by lifting and moving bags ergonomically and effortlessly with the help of suitable suction cups.

ERGO : trigger mechanism

EASY : trigger mechanism

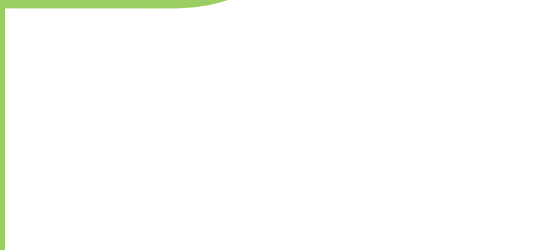

MASTER : rotating handle

## OUR RANGE OF PRODUCTS

Manut-LM will guide you to choose the range of control handles best suited to your load handling.
